

6700/6800 Series

Pushplate Exit Controls

- *Heavy Duty*
- *Special Finishes*
- *Engraved Signage*
- *Tamper Resistant*
- *Lifetime Warranty*

Description

DynaLock 6700 & 6800 Series Pushplates offer a heavy duty alternative to standard pushbutton egress controls. They are available with either pneumatic time delay (PTD), momentary, or alternate-action switches, in standard single-gang (6700 Series) or narrow mullion style, for use in aluminum storefront frames (6800 Series).

Precision machined from solid 6061 aluminum, DynaLock Pushplates are designed to withstand high-traffic, abusive environments, while maintaining an attractive appearance. Over travel is eliminated by design thus prolonging switch life. All models feature engraved "PUSH TO EXIT" signage and are available in eight architectural anodized finishes. Consult the factory for special engraving.

Specify the 6700 & 6800 Series for controlled egress anywhere a pushbutton would typically be used.

Standard Features

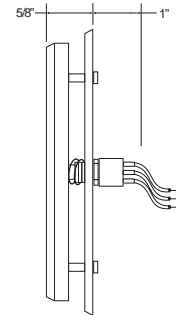

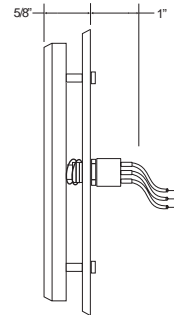

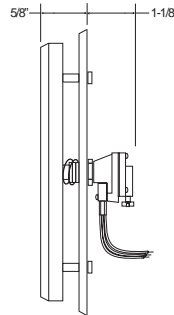

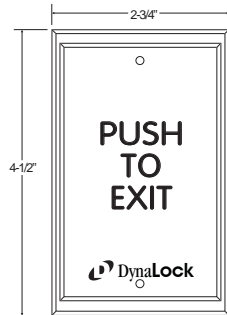

- **Durable** anodized aluminum available in a variety of architectural finishes. US28 satin aluminum standard.
- **Low Profile:** Extends only 5/8" from the wall.
- **Tamper Resistant:** Allen head mounting screws behind front plate.
- **Rugged Engraving** will not fade or scratch.
- **Lifetime Warranty:** Made in the USA by DynaLock, with over 20 years experience in the manufacture of electromagnetic locks.
