Specifications

Contact rating: PTD: 10 Amps @ 125VAC / UL
                    All Others: 6 Amps @ 125VAC / UL
Terminations:    7” Color-Coded 18AWG Leads
Current Draw:    30mA @ 12 or 24 VDC

Lamp illuminates indefinitely. Optimal brightness up to 10,000 hours (continuous usage). Consult factory for field replacement.

Description

Double gang pushplates utilize electroluminescent “EL” flat light illuminated signage, providing enhanced visibility in smoke and/or darkness. Electroluminescent light is a true field-source emitter, having greater perceived brightness at considerable distances, helping occupants safely find the 6500 exit control, and the adjacent exit door in an emergency.

Options

DP  DPDT Switch (Not available with PTD option).
CS  CUSTOM SIGNAGE - Special order. Consult factory for price and availability.

Example: 65 - PE - MO - 12 - US3 - DP
Monitor & Control Stations

Four-Zone Delay Egress Monitor & Control Station

6350

Four-Zone Delay Egress Monitor Station

**Description**

Four zone monitor station designed exclusively for use with DynaLock Series 3101B Delay Egress Locks equipped with the Dynastat Force Sensor Option (DYN). The 6350 is mounted on a standard two-gang plate and includes four bi-color LED indicators and one audible sounder, with mute switch, to visually and audibly signal delay egress status at a remote location.

The 6350 includes a two-gang masonry backbox and a Model 5312 12VAC plug-in transformer power supply. A three-conductor wire run is required between each Delay Egress Lock and the 6350, for full functioning.

**Specifications**

- **Input Voltage:** 12 VDC/VAC / .042A
  (12VAC plug-in transformer included)
- **Faceplate:** Double-Gang
- **Finish:** US32D Brushed Stainless Steel
  (Others Available)

See back page for options, available special finishes & switch terminology
Monitor Stations
